A large liquid oxygen (LOX) plant has been observed on recent photography of Balashikha, a suburb on the east side of Moskva, USSR. The plant is located on the east side of Balashikha, north of the Moskva-Gorkiy highway. Photographic analysis indicates that the plant may be divided into 2 sections, a LOX section and a LOX machinery section, where machinery for other LOX plants would be manufactured.

There has been little change in the plant since KH-4 photography of [REDACTED] although 1 small building was added in the NW corner of the LOX machinery section. [REDACTED] from the World War II period revealed that approximately half of the LOX section and none of the LOX machinery section was present at that time.
